### **DETAILED ACTION**

Applicants amendment of claims 1, 7, 11-3, 19-21, 26, 29-31, 36 and 37 in the paper of 9/28/2004 is acknowledged. Claims 1-5, 7-9, 11-17 and 19-50 are present for examination. Applicants' arguments filed on 9/28/2004, have been fully considered and are deemed to be persuasive to overcome some of the rejections previously applied. Rejections and/or objections not reiterated from previous office actions are hereby withdrawn.

Claims 38-50 are withdrawn from further consideration by the examiner, 37 CFR 1.142(b), as being drawn to a non-elected invention.

### ***Claim Rejections - 35 USC § 112***

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 1-5, 7-9, 11-17 and 19-37 remain rejected under 35 U.S.C. 112, first paragraph, as containing subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

Claims 1-5, 7-9, 11-17 and 19-37 are rejected under this statute because applicants newly amended recitation to "purified recombinant heparanase having at least 95% homology to SEQ ID NO: 1" is not supported by the original specification,

Art Unit: 1652

thus this referred to subgenus is considered new matter. Specifically applicants recitation of the subgenus having 95% homology is not supported by the original specification.

Applicants continued arguments regarding support for such a limitation is acknowledged, however found non-persuasive. The allowed language of U.S. patent No. 6,798,658 (Application Serial No. 09/988,113) as well as its relationship to the instant application are acknowledged, however this does not persuade the examiner that applicants have support for the above recitation in the instant application. The only application which the instant application and U.S. patent No. 6,798,658 share in common is 08/922,170 and each of the child applications claims a relationship to this parent application through multiple "continuation-in-part" applications. Thus, unless applicants can point to such specific support within the referred to parent application, it remains to be seen where applicants have support in the instant application for the above recitation of 95% homology.

### ***Conclusion***

**THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the

Art Unit: 1652

shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
